Dear friends, in this article, I intend to talk about a topic that I felt an internal need to talk about. Which is the question of the Anunnaki being beings like humans, at a high level of existence and evolution. Doing a bioequalistic analysis on them. I felt this need because it was something that was making me very distressed for some time, due to the excess of antianunnaki content that you find in various places on the internet.

Much is said on the internet about the Anunnaki being fallen angels (Nephilim) or even powerful manipulators. I have already refuted these two theses in articles prior to this one, however, I will focus on the question of bioequalism, of the anunnaki being beings like humans, and not fallen angels or even powerful manipulators.

Since antiquity, the Anunnaki have been regarded as article gods, who protected humans and helped humans to evolve and have various advanced technologies and knowledge. Just as they were not expelled from the skies or things like that, but they went back and forth to the heavens and to their worlds of equal origin as if people leave one region to another region.

On the question of ancient gods, they never imposed religion on humans, but let humans worship whoever they want, so the humans who created the religions, not the gods, as humans say. Always teaching humans to focus on their own divinity (spirituality) and their spiritual self-improvement.

The Anunnaki, then, were in fact ancient gods. But now, we see that they are simply beings like humans on a high level of existence and evolution, just as all gods and beings on other levels of existence are also. So, we see that, the Anunnaki are, in fact, mythical humans, not because they are just like humans, but because they are also a type of humans, since they contributed a little to human evolution and because they are well similar to humans as well. Soon being mythical humans.

With that, we realize that the Anunnaki are beings like humans, who had and still have their reputation and contributions as gods, but in practice, they are beings as much as humans, and still very close to humans. The antianunnaki, want to deny this and encourage prejudice against the anunnaki, because they do not accept that the anunnaki had their positive contributions to humans and are creating several lies and stereotypes about the anunnaki, as well as what the awtokistas (antimitics) do with the mythical. That is why the fight against antianunnakismo is as necessary as the fight against antimiticalism (awtokism).

On the issue of bioequalism, which I almost forgot to mention in this article, bioequalism aims to help humans understand this about anunnaki, myths and beings from other levels who are, in practice, beings like humans, but at different levels of existence and evolution. Being able to help humans to really evolve and to end prejudices such as anti-anunnakism, anti-mythicalism (awtokism), fallenangelism among others.

So, what we conclude is that the Anunnaki had their contributions to humans as gods, and that now, we see that they are beings like humans, who have a DNA similar to humans and are still very similar to humans, therefore, we can rest easy and realize that the Anunnaki are, in fact, beings like humans, only even though there are differences in the question of the level of existence and evolution, besides of course, having their extraphysical materialized and biological forms, while humans just have the biological form for now.
